

Sunsail 44i

The Sunsail 44i is a high-performance cruising yacht built for comfort and designed for those looking for a fun week of sailing, true to our strategy of offering comfortable blue-water yachts that combine excellent equipment and great performance.

Jeanneau's insistence on high-quality fittings and the delivery of interior volume without sacrificing performance perfectly matches Sunsail's brief. A strong commitment to environmental protection is also key, with Jeanneau's Prisma Process injection moulding resulting in a 90% reduction in harmful emissions.

The Jeanneau 44i is new to the Golden Rock Regatta and we expect to have more than 5 boats of this type entered in which case they will sail as a "One Design" Class

Max passengers	10
